

BLUE BOTTLE COFFEE

NUTRITIONAL BOOK

Spring 2024

INTRODUCTION

At Blue Bottle, we bring uncompromising care to everything we do.

This means we offer the most delicious coffees we can find, as well as food made from honest and pure ingredients. Our coffees are harvested and processed with care for the environment and the people behind them; we bring this same sensibility to our food menu. We source our ingredients and pastries from partners who share our values in the hopes of making a positive impact on local food communities, echoing our contributions to sustainable coffee growers all over the world.

In 2017, the FDA federally mandated eating establishments with over twenty locations make nutritional information available to their guests. Since studies show that most Americans eat and drink about one-third of their calories away from home, this mandate is meant to help consumers make informed choices for themselves and their families.

We believe that eating is fundamentally a pleasure, and we will continue providing foods that are high in quality, are sustainably sourced, and pair deliciously with coffee. It's our hope that providing the nutritional information for all our offerings will help guests leave our cafes feeling cared for and fulfilled.
